

ABC'S Training Tuesday- Part 3

Importance of Irrigation System Maintenance

Hosted by the Almond Board of California

Tuesday, March 15 | 8:00 am – 9:30 am

Getting the most out of the water used for irrigation requires an irrigation system running at peak performance. In this session, participants will learn about working with mobile irrigation labs and what can be discovered with a distribution uniformity test. The webinar will also look at the importance of irrigation system maintenance, things to check and service and the impacts poor uniformity and system leaks can have on water used and the checkbook.

8:00 a.m. Welcome

Miranda Thomas, Almond Board of California

8:05 a.m. Observations from a Mobile Irrigation Lab

Kevin Greer, Tehama County Resource Conservation District

8:45 a.m. Irrigation System Maintenance, Saving Water & Money

Tom Devol, Almond Board of California

9:20 a.m. Q&A Session
